

## Mirror Care/ Maintenance Instructions

### Our Recommendations

- Use a soft cloth for cleaning.
- Use water with a mild detergent free of phosphates with neutral PH for cleaning and/or a dilution of 20% isopropyl alcohol with demineralized or distilled water.
- Do not use products with an ammonia base, example: Windex
- Do not use rough, hard or aggressive products that can cause severe damage to the glass.
- Do not use acidic, high alkaline or very abrasive content cleaners.
- Make sure that there is no residue of cleaning products around the edges of the mirror.

### Important

The use of acidic cleaning products, with high alkaline content or that are very abrasive, with ammonia base (Windex) or with corrosive agents, as well as other types of cleaning products not specified and/or authorized by CVGS will void the warranty.
